

Dear Ladies and Gentlemen,

safe&easy – this is the motto by which SCHURTER manufactures all of its electrical and electronic components. After all, we place the highest priority on safe power feeds and the simple operation of equipment.

Compatible in the transition phase

DC connectors according to IEC TS 62735 are (still) new territory. Tailored for the time being to a very specific clientele and demanding due to the new technology, they pave the way for a future-oriented, efficient power supply with enormous potential for various fields of application.

FMAC NEO: 3-Phase Mains Filter

SCHURTER launches its single-stage filter family FMAC NEO. Especially compact with high performance, the new filter series is ideally suited for use in today's more portable industrial machines, designed to occupy less floor space in manufacturing plants.

Industrialization of satellites

The use of space by satellites has so far focused on scientific, communicative and military aspects. This will change massively in the future. Whole swarms of small satellites are to orbit the globe and supply mankind with Internet from orbit.

SUT-H: for high inrush currents

With the SUT-H, SCHURTER introduces a new 6.3x32 mm ceramic fuse for single-phase applications for high rated currents from 10 A to 50 A. Thanks to a particularly high melting integral, it is particularly suitable for applications in which high inrush currents occur.
